PROFESSIONAL SUMMARY

WordPress Developer with **6+ years of experience** in **WooCommerce, Custom Plugin Development and Theme development**, and performance optimization. Skilled in **PHP, JavaScript, MySQL, REST APIs, and third-party integrations**. Experienced in solving complex technical challenges and delivering scalable, secure, and high-quality solutions. Proficient in **AI-powered development tools** for coding, debugging, automation, and problem-solving.

WORK EXPERIENCE

WordPress Developer | E2M Solutions, Ahmedabad

July 2024 – Present

- Managed assigned client projects and **coordinated work across Development, Design, SEO, and QA teams**, ensuring **smooth execution, clear communication, and timely delivery**.
- Developed and optimized WordPress, WooCommerce, LMS, and event solutions, while **resolving complex** WordPress, PHP, performance, and server-level **issues** to deliver reliable and scalable websites.
- Leveraged **AI-powered tools such as Claude Code, Cursor and Weam AI** for coding, debugging, automation, and technical problem-solving, improving development efficiency and overall productivity.

WordPress Developer | UnlimitedWP, Ahmedabad

Dec 2020 – Jun 2024

- Developed and deployed high-performance custom **WordPress websites using ACF and modular template** architectures, with a focus on scalability and maintainability.
- Contributed to the development of the publicly released **Project Cost Calculator WordPress plugin**, along with custom **REST APIs and third-party integrations** such as MIOwifi.
- Handled complex WordPress debugging, **WooCommerce and LearnDash customizations**, and LearnPress bug fixes with **custom feature development**. Executed **complex data migrations** using import/export tools and custom scripts, ensuring data accuracy, smooth transitions, and minimal downtime.
- Managed **Git workflows**, staging environments, WordPress multisite networks, and enterprise migrations, while providing technical support and **resolving critical issues with minimal downtime**.

Junior Software Engineer | LogixBuilt, Surat

Dec 2020 – Jun 2024

- Developed dynamic web applications using PHP, MySQL, HTML5, SCSS, and JavaScript, with a strong focus on clean, maintainable, and responsive code.
- Built custom WordPress themes and responsive layouts using **Gutenberg, Elementor, Divi, and Beaver Builder**, while optimizing websites based on **PageSpeed and GTmetrix performance metrics**.
- Managed server configurations, DNS, domain mapping, and hosting migrations, ensuring smooth deployments and minimal downtime.

EDUCATION

Bachelor of Computer Application – Apr, 2016

VNSGU University, Surat

Master of Computer Application – Apr, 2019

GTU University, Ahmedabad
